

Hedi Kyle Belt Fold

1. Fold bottom right corner up to form a triangle.
2. Fold tip of triangle to the left.
3. Fold right hand end over the same width as the upper edge of the triangle.
4. Unfold all the way back to step 1. (Image only shows strip partially unfolded.)
5. Fold left end up in front, matching bottom edge to existing fold line.
6. Fold top end (former left end) to the left and behind along line shown in step 5. Bottom edge of left end should be in line with top edge of right end.
7. Flip vertically, top for bottom. (This step is not shown.) Fold right end down.
8. Fold right end over to the left along line shown in step 7.
9. Fold left hand end to the right and behind. Fold should match the tip of the upper triangle.
10. Fold right end (former left end) up and behind. Vertical strip should now be at right angles to what is now the left hand end.
11. Fold left end around the back to the right.
12. Tuck end triangle into the pocket formed by the upper triangle on the front.

To close belt, slide long end through the opening under the two triangles on the front.
